**Dominion Global Trends – Managed Fund a sub-fund of Dominion Global Trends SICAV p.l.c.**

**Managed EUR A Class – (ISIN: MT7000005914). This Sub-Fund is self-managed.**

### Objectives and Investment Policy

The Managed Fund will seek to obtain its Investment Objective by investing in a diversified portfolio of shares in companies and other securities equivalent to shares in companies, and CISs which invest in shares of companies and other securities equivalent to shares in companies. Investment in transferable securities will be made directly.

Any investments in FDI's will not be synthetic and will be used for efficient portfolio management purposes only and not for investment purposes.

Up to 10% of the assets may be invested in securities which are unlisted, but which intend to list within 12 months of purchase. The Investment Committee will keep under review and, may, from time to time amend the asset allocation as it may consider necessary with a view to achieving the Sub-Fund's Investment Objective.

If, in the opinion of the Investment Committee, the prevailing market and economic conditions warrant the adoption of such a policy, the Fund may also, from time to time, in order to attempt to reduce risks inherent in the Fund's portfolio invest its assets in debt securities, money market instruments, money market or cash funds and cash deposits. Debt securities invested in during such periods of attempted risk reduction will primarily consist in investment grade sovereign or corporate bonds without bias towards any particular sovereign or market sector. The Fund may also invest in forward currency FDIs to hedge currency movements against certain investments held by the Fund.

The Fund does not seek to obtain its Investment Objective through borrowing.

### Risk and Reward Profile

The above risk and reward indicator rates this Share Class as category 5 meaning that it offers a relatively higher risk of making a loss but also a relatively higher chance of making gains. It should be noted that even the lowest category on the indicator does not mean risk free.

Managed Fund's rating on this indicator is based on historical data and therefore may not be a reliable indication of the risk profile of Managed Fund in the future. Further, the rating shown is not guaranteed and may change over time.

Managed Fund's rating reflects the nature of its investments and the corresponding risks to which it is exposed. These risk factors, which include the following risks, may affect the value of Managed Fund's investments or expose it to losses:

#### Investment Risk

The price of the Shares and the income (if any) from them may go down as well as up reflecting the risk of investing in international markets and that investors may not receive back the amount that they originally invested.

#### Currency Risk

Any investments in international companies will mean that changes in currency exchange rates will have an impact on Managed Fund.

#### Managed Investment Risk

It cannot be guaranteed that investments in global strategic trends will generate continued growth in the future. It is also possible that the Fund may not be able to identify sufficient high-quality investment opportunities.
